

Proven Veeva Vault Migration Solution

When Migrating Legacy Data To Veeva Vault, Here's How To Achieve 100% Confidence 100% of the Time.

Veeva Vault is transforming regulated content management for life sciences by providing a platform and suite of applications that brings content, partners, and processes together in the cloud.

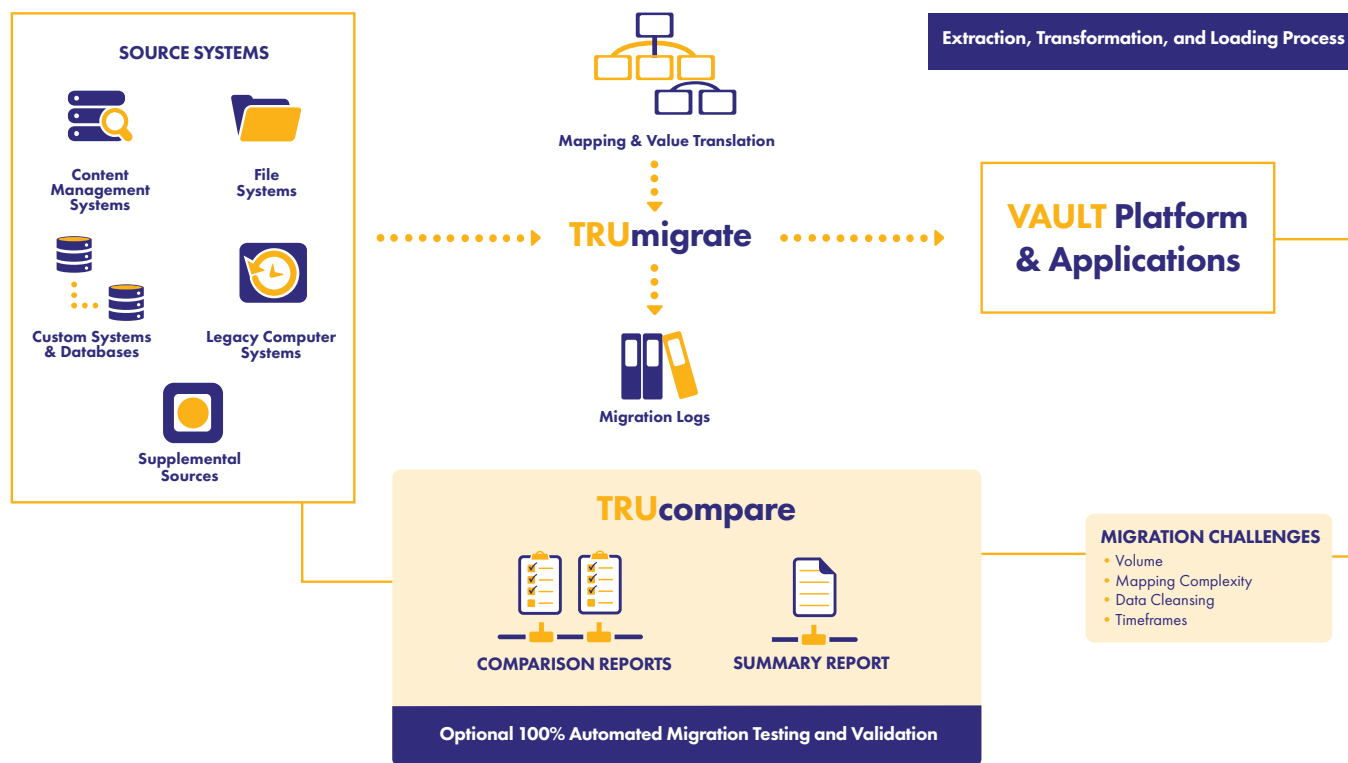

Of course, the cloud is a big place. So when you decide to migrate your legacy data to Veeva Vault you want to make sure it gets there with minimal risk.

That's where Valiance Partners comes in. Used in over 400 migrations to date, our TRUmigrate and TRUcompare have been successfully integrating with Veeva Vault since early 2012. In fact, it's become the preferred pathway for migrating legacy data to the Vault.

But that shouldn't come as a surprise. After all, our unique data migration testing application provides 100% verification of data and content. And we do it without retesting over and over again. Or going over budget or over schedule.

Valiance Partners is the leading provider of GxP migration software and services when compliance and business risk demand getting it right. In addition to working with Veeva to successfully deliver solutions and collaborate on enhancements to their API for migrations, we also offer out-of-the-box solutions for a wide variety of other sources, applications, and technologies.

Proven Veeva Vault Migration Solution

Since 2006, TRUmigrate and TRUcompare have helped our clients experience 100% testing with their data migrations for the same or less than what they would have paid for traditional manual testing techniques.

Whether you have modest volumes of data or millions of documents; a single system or a large scale consolidation; with Valiance Partners you can rest assured that your data migration will be done right the first time.

We promise we'll not only migrate your legacy data to the cloud, your confidence in the results will put you on cloud nine.
