

## GxP Application Integrations Made Simple.

If you're an FDA regulated organization looking for greater insight and control from distributed, heterogeneous GxP systems applications, TRUconnect can facilitate the integration of these critical applications —without any coding.

TRUconnect supports a broad range of GxP platforms out of the box, including on-premise and cloud-based platforms. TRUconnect accelerates integration and provides the ability to connect data and applications in real time – ensuring that the information is available, reliable and actionable. The TRUconnect architecture has been designed from the ground up for multi-threading and unlimited scalability. With TRUmigrate in place, you'll never second-guess the success of your most complex projects.

### TRUconnect Benefits:

- ✔ Ability to interact through Web Services and XML exchange
- ✔ Transactions can be nested across technology adapters
- ✔ Adapters support over 25 different transactions, including:
  - Creating and modifying records, objects, and content files
  - Operations on versions and version trees
  - Searching and retrieving
- ✔ Ability for TRUconnect developers to create custom adapters
- ✔ Connections are made through secure web services augmenting application-level security
