TRUconsole

The Essential Migration Management Tool.

TRUconsole is a collaborative migration management tool that provides a central user interface for the organization and collaboration of migration and consolidation jobs.

Its capabilities include management of migration resources, configurations, execution priorities and dependencies during a migration project. TRUconsole is tightly integrated with TRUmigrate and TRUcompare and its easy-to-use interface allows multiple migration streams to be run efficiently and simultaneously.

TRUconsole Benefits:

- Decreased need for administrative oversight through automated functionality – migration projects are simplified greatly

- Eliminates costly error-prone manual steps

- Minimal learning curve due to an intuitive user interface

- Easy access to migration logs, projects, shared resources – allowing for quicker troubleshooting during a migration project

TRUconsole

TRUconsole features include:

1 **PROJECT MANAGEMENT -** Manage multiple simultaneous migration projects and multiple configuration resources using the TRUconsole.

2 **EXECUTION MANAGEMENT -** Eliminates manual operations, automatically managing execution dependencies while creating and maintaining run history.

3 **PROJECT ORGANIZATION -** TRUconsole gives the user one-click access to all jobs and resources while keeping track of all migration runs from one central location

4 **SHARED RESOURCES -** TRUconsole provides access to all common resources from one location and all resources can be used by multiple jobs

5 **JOB ORGANIZATION & EXECUTION -** TRUconsole allows the user to create and edit jobs, operate parallel job executions, manage log files automatically, and assists with the management of run history.
